

There is a solution to the signal problem that could not only make WPVM heard throughout the Asheville area, but extend the signal to all 14 counties served by the Mountain Area Information Network. a "non-local" station (WIMZ of Knoxville) is creating massive interference for our local WPVM-LP due to the unique contours of our mountainous terrain. LPFM stations, especially those in challenging mountainous terrain, should be permitted to own translators. I support the FCC's position on getting rid of the obsolete regulation of "third adjacent channel" spacing. I also support the FCC's effort to increase the number of LPFM stations on the air and strengthen the viability of those stations that are already operating. Thank You.
